

Senior Geologist and Mining Engineer Required

Venmyn is looking for a suitably-qualified Senior Geologist as well as a Senior Mining Engineer to join its team.

The Senior Geologist should have a minimum of five years experience and also have Datamine proficiency.

The Senior Mining Engineer should have a minimum of five years operational experience.

The positions have been newly created and are part of a growth strategy at Venmyn that will see it increase its product offering, enhance its availability and expand its floor space.

To apply for the positions at the growing mineral sector advisory firm, please send a detailed CV to Michelle Rieder at michelle@venmyn.com

Kindle™ provision shows commitment to innovation

As part of Venmyn's commitment to continuous innovation where appropriate, the company will be providing those who attend its five-day Compliance and Reporting Rules in the Minerals Industry course, at the University of Pretoria, with course material on a Kindle, which will be included as part of the course fee of ZAR6,500.

The Amazon Kindle is an ebook reader that allows readers to download and read books, newspapers and other digital content on screen. Its advantages include that it eliminates the need for paper and allows users to access documents and books in an easy portable form.

Venmyn has provided delegates with hardcopy notes since the inception of its course ten years ago. However, technological advancements, as well as a drive towards a greener economy, with a reduced reliance on paper, suggest that it is an opportune time to introduce a paperless technology for its course.

For more information on the course and to register go to:-
